SOLUTIONS THAT CUT REPORTING TIME BY 90%

Nucleus Research delivers research and insight based on actual ROI assessments. In a recent study of Unit4 ERP and HCM solutions they found:

Most customers can reduce staff time associated with managing multiple solutions by 20 to 40 percent, and one organization saw a **50 percent reduction.**

The single source of truth across all products removes fragmented people and finance data silos and can reduce reporting and processing time by **up to 90%.**

Organizations can significantly reduce the manual processes that the HR team must deal with, and overall reporting and processing time can be cut by an average of **50 to 70%.**

Users that implement data consolidation with joint ERP and HCM solutions report better decision-making and reduced errors by **10 to 20%.**

Organizations that fail to modernize will quickly fall behind the competition as new solutions boost their competitor's innovation and agility.
