Your Cloud ERP journey starts here

Uncover the different steps you need to take to get up and running in the Cloud.

A high-speed journey to the Cloud	**A transition process with minimal disruption**	**A clear project overview with full transparency**

Step 1: Engaging

Define your needs
Before starting, we'll work with you to identify the available information you have about your organization to set your migration project's initial scope and needs.

Cloud migration assessment
Your Cloud journey begins with a Cloud Migration Assessment. This evaluates how ready you are to move to Cloud, creating a detailed migration proposal with next steps.

Doing this gives you a complete insight into your current solution environment and a clear path for you to make a move over to Cloud.
Solution agreement
Following the assessment, we provide you with a clear onboarding plan that includes your migration project with timeframes and responsibilities clearly defined upfront.
Your solution evaluation identifies usage details like:

- Transactions and intensity overview
- Number and types of customizations
- Number and types of interfaces
- User numbers
- Processes for non-standard functionality
- Most commonly used screen views

Step 2: Onboarding

Plan and prepare
Kick-off meeting | Future Cloud platform creation | Migration prep

Transform

1. Cloud transformation
- System upgraded to target release

3. User
- System test of updated Unit4 system
- Ensure critical business processes are running as expected

2. Migrating your solution
- Compliance check
- Uplift customizations
- Perform code review and deploy database

4. Validation & approval
- Support during cutover

Deploy
Go live

Step 3: Business as usual

After you go live, you will receive ongoing support from your Unit4 Customer Success Manager.

Start your journey to the Cloud today with a Cloud Migration Assessment.
